T12 “STRAIGHT FROM THE HORSE’S MOUTH’: The Truth About Equine Assisted Psychotherapy

Results are being obtained from cutting-edge techniques of using horses as a tool for emotional growth and learning called Equine Assisted Psychotherapy (EAP). EAP partners, horse professionals and mental health professionals who utilize a solution-oriented and reality approach that has the added advantage of implementing horses that respond to participants. The work is not about recreational activities with horses, but involves challenging exercises designed to bring about insights into current behaviors and thought patterns that require the clients to make actual changes in those behaviors to be successful. Improved skills include communication, assertiveness, problem solving, responsibility, teamwork, relationships, self-esteem, and attitudes. EAP is gaining popularity in the mental health community as its effectiveness has become known among families and professionals such as programs, courts, and clinicians.

This workshop will have horses on hand to demonstrate what EAP sessions look like, and how this modality can be incorporated to produce higher success rates with youth and families.
